DETAILED ACTION

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.
2. The Certified Translation of the Foreign Priority Document, filed on August 4, 2008 is sufficient to overcome the Feucht et al (WO2004/020659) reference. Applicant's affidavit showing of the certified translation of the priority document PCT/DE03/02482 is sufficient to show that the reference WO2004/020659 was published after the effective filing date of the instantly claimed invention. Additionally, the examiner adds that the US counterpart to the reference WO 2004/020659, US PGPub NO. 2006/0111517 is not prior art because it has the same effective filing date, July 23, 2003, as the instantly claimed invention and is thus not prior art.

Response to Arguments

3. Applicant's arguments, see Translation/Remarks, filed 8/4/2008, with respect to claims 1-9 and 12-13 have been fully considered and are persuasive. The rejection of claims 1-9 and 12-13 under 35 USC 102(e) as being anticipated by Feucht et al has been withdrawn-see above.

Allowable Subject Matter

4. Claims 1-9 and 12-13 are allowed.
5. The following is an examiner's statement of reasons for allowance: The prior art, alone or in combination, fails to teach a photostructurable liquid as defined in claim 1. The closest prior art would be to Beuhler et al (6,391,937). Beuhler et al teaches polyacrylamide hydrogels obtained from polyacrylamide reactive polymers with or without external crosslinking agents. Said polyacrylamide reactive polymer is a partially polymerized prepolymer having at least one reactive group. The reactive group can be introduced into the acrylamide polymer by copolymerization of said acrylamide with a monomer such as glycidyl (meth) acrylate, acrylic

Art Unit: 1796

acid, N-(6-acryloylhexyl)-2, 3-dimethylmaleimide, vinyl cinnamate, vinyl acetate and others--see column 5, lines 54-56. Said reactive prepolymer can be crosslinked via the reactive groups alone by exposure to radiation or said prepolymer can be crosslinked in the presence of a multi-functional crosslinker by exposure to radiation. The primary difference is Beuhler et al does not teach or suggest the use of film former or softener in the production of said hydrogel as required as essential components in the instantly defined claims. Thus, the instant claims are distinguished over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sanza L. McClendon whose telephone number is (571) 272-1074.
